

SCHOOLS FOR WILDLIFE

LINKS TO BIODIVERSITY MODULE

The CERES Schools for Wildlife program provides a great opportunity to tick off lots of actions in the ResourceSmart Schools **biodiversity module**, while also engaging students in hands-on, rewarding, sustainability learning.

Below is a list of actions from the biodiversity module that ResourceSmart Schools can complete by taking part in Schools for Wildlife:

- A2.2** We have completed staff professional development on biodiversity and associated themes
- A2.3** We have applied for biodiversity related grants, awards, or competitions
- A2.4** We have planting procedures in line with local considerations
- A2.2** We have completed staff professional development on biodiversity and associated themes
- A2.3** We have applied for biodiversity related grants, awards, or competitions
- A2.4** We have planting procedures in line with local considerations
- B1.3** We have included authentic, immersive, hands-on learning opportunities in our biodiversity education program
- C1.1** We have communicated our biodiversity activities, including progress made to improve our biodiversity, to our school community
- C1.2** We have completed at least one school learning story that celebrates our biodiversity achievements and shared this with our school community
- C2.1** We have involved students in the development of our biodiversity program
- C3.1** We have collaborated with our local council and/or regional authorities to develop and participate in biodiversity related projects within the school and/or wider community
- C3.2** We have participated in local biodiversity activities
- C3.3** We have shared biodiversity related ideas and activities with our school community to encourage them to be more biodiversity aware and active at home
- C3.5** We have received support for biodiversity related projects from local, state and federal governments, local businesses and local friends' groups
